PROFESSIONAL SUMMARY

Tech artist and self-taught game developer bridging code and visual design to build playable, polished systems. Eight years of hands-on development across Unity and Unreal Engine, with a focus on programming, 3D prop modeling, lighting, and asset creation.

EDUCATION

University of Central Florida

Bachelor of Science, Digital Media (Tech Art).

Expected Spring 2027

Valencia College

Associate of Arts, General Studies.

2025

Parrish Community High School

G.E.D.

2023

EXPERIENCE

Self-Directed

2017 – Present

Independent Game Developer

- Built Under Staffed (Unity/C#, group of 7): designed the core worker system including drag-and-drop assignment, workstation functions, interaction system, UI scripted elements, timer, and door logic.
- Developed Station (Unity/C#, solo): a multiplayer procedural extraction horror game using procedural generation, 3D modeling, lighting, and post-processing — primary portfolio piece currently in active development.
- Designed Shift (Unreal/Blueprints, solo): a gravity-switching first-person shooter with volume-trigger gravity orientation, a functional weapon and ability system, and fully lit levels designed for competitive 3v3 play.
- Contributed to Sound Smith (Unity/C#, small group): built workstation randomization, save system, boss battle logic, and implemented 90% of the game's sound effects.
- Maintains strict focus on modular, optimized, well-commented code; checks in with leads before making changes across collaborative projects.

Delivery Driver

April 2026 – Present

DoorDash

- Managed time and route navigation to ensure timely, reliable order delivery while balancing coursework and personal projects.

Deli Associate

March 2024 – October 2024

Publix Inc.

- Delivered customer service in a fast-paced deli environment, rotating across multiple positions as needed.
- Memorized and applied company regulations to consistently meet customer expectations under pressure.

SKILLS

3D Art and Modeling: 3D Modeling (Blender), Substance Painter, UV Unwrapping, Texturing, Lighting, Post-Processing, UI/UX Design

Game Development: Unity, C#, Unreal Engine, Blueprints, Procedural Generation, Multiplayer Systems, Audio Implementation

Other: Level Design, Asset Creation, Team Collaboration
